Clothing and personal protective equipment

2024

Practical for leisure, perfect for work.

Our target, our challenge, is to realize durable, comfortable and even attractive gar- ments; to make this we use technical fabrics, we cooperate with experienced designers and pack the product in qualified and reliable laboratories.
What is all this about ?
Workwear or sportwear for leisure?
Leave it to you to judge.

ICONS

To help you quickly identify the main features of the articles. ICONS To let you easly find the products' main features.

SOFT SHELL	These products are manufactured with a technical fabric that gives to the garment extra protection against weather conditions thanks to its feature against wind, waterproofness and breathability.
WIND PROOF	
BREATHABLE	Products manufactured with breathable fabric that keeps the body dry for a better comfort.
WATER PROOF	Products manufactured with waterproof fabric.
TEFLON TREATMENT	Teflon® TREATMENT A product Teflon treated on its surface grants water repellency. The fabric of these products with treatment on their surface are more resistant to dirt.
ROLLER KEYS	Products equipped with a very nice and useful gadget inside a pocket. It is an expandable and retractable nylon yarn with a little karabiner for hooking your keys and not lose them anymore.
4 WAY STRETCH	It is an elastic fabric that has the same elasticity in all directions, thus guaranteeing the worker excellent freedom of movement.

WHAT IS THIS YELLOW LABEL?

All our garments equipped with a yellow label showing the RdP number (Test Report) / Certificate issued by the Ritex accredited laboratory, are certified as PPE in "CAT. I "while garments that are not CE marked or generically CE marked, or not accompanied by certification, ARE NOT PERSONAL PROTECTION DEVICES, but generic clothing.

The tests necessary for the RdP / certificate also serve to check the resistances of the materials that must be equal to or higher than our standards.

ISSALINE BY PIP

Workwear.

Performance, Style and Safety.

ISSALINE workwear is the ideal choice for professionals who want a functional, durable
and stylish outfit to face every working day with confidence. With a focus on quality and attention to detail, our clothing line guarantees maximum performance for workers in every field.

Key Features:
high-quality materials. We use resistant and durable fabrics to ensure that our garments are ready to withstand the daily challenges of the job.

Ergonomic design:
ISSALINE clothing is designed with an ergonomic design to ensure a comfortable fit and optimum freedom of movement.

Protection for all Occasions:
From windproof and rainproof jackets to protective suits and reflective vests, we offer solutions for every working condition.

Integrated functionality:
our garments are equipped with pockets and compartments strategically positioned to facilitate the transport of essential tools and equipment on the job.

Professional Style:
combine performance and style with our modern and stylish garments designed to give a professional and well-groomed appearance to the worker.

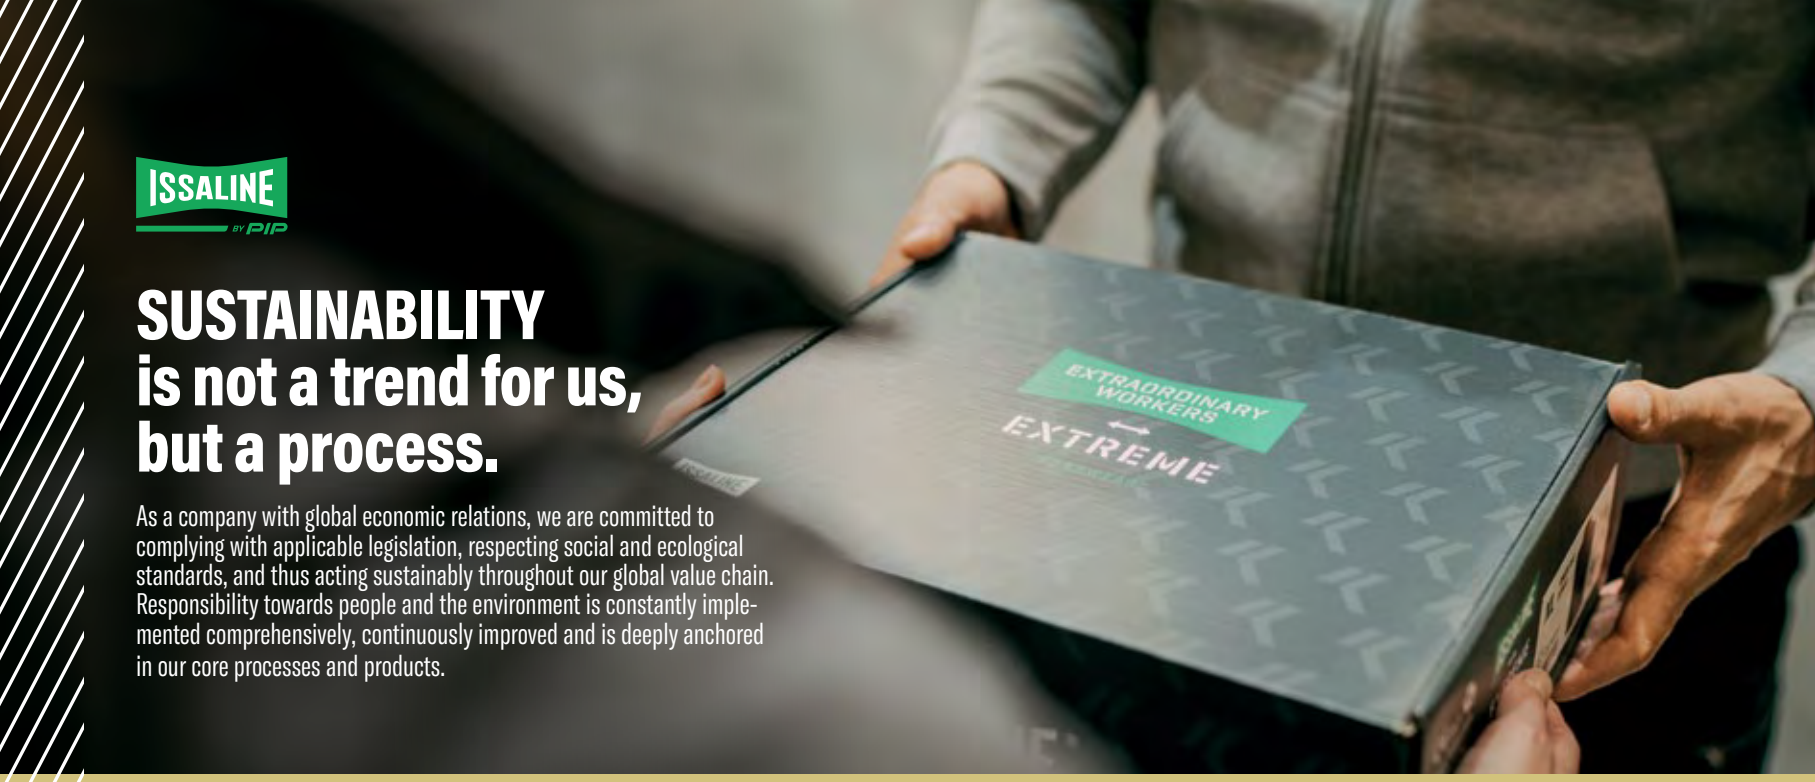

Whether you are a bricklayer, gardener or industrial technician, ISSALINE workwear provides you with the safety and comfort you need to tackle your tasks with confidence and style. Choose ISSALINE for a reliable outfit and superior quality, and discover how our clothing can contribute to your success at work.

Note: The certification values shown in this catalogue may vary due to the continuous updating process; for exact data, please ask for updated technical data sheet.

SUSTAINABILITY is not a trend for us, but a process.

As a company with global economic relations, we are committed to complying with applicable legislation, respecting social and ecological standards, and thus acting sustainably throughout our global value chain. Responsibility towards people and the environment is constantly implemented comprehensively, continuously improved and is deeply anchored in our core processes and products.

We reduce the use of plastic and we use cardboard boxes.

We are firmly committed to reducing the use of plastic or plastic-derived packaging (where possible); using recyclable cardboard boxes.

Sustainable boxes.
ISSALINE is committed to using this packaging system, which is ecologically more sustainable than plastic. A packaging system that not only helps us generate less environmental impact, but also facilitates the display of the product in the shop, an added value to the product.

8883B TUBE

SOFTSHELL WATERPROOFNESS BREATHABILITY

WP - WATERPROOFNESS: is measured in mm reached by a water column placed over the fabric before the water pass trough it: the higher the column (higher pressure) the more waterproof the fabric.

BR - BREATHABILITY: is measured in mvp that's the qty of water vapour (in grams) that vaporises through one square meter fabric over a 24 hour. The larger the number, the more breathable the fabric.

SOFTSHELL Issa garments use tPu membrane from sportwear that allow to combine two features, waterproofing and breathability, considered incompatible for long time. Issa membrane presents thousands of tiny holes, small enough not to pass the water molecule, but large enough to allow vapor perspiration so as to keep the body dry and body temperature pleasant.
The body of an adult man can produce a quantity of sweat per hour equal to 50 ml in resting phase, one liter per hour during heavy work activities and up to four liter during an Olympic mara- thon. It can be easily understood that the sweat that cannot be transferred outside stays on the skin and soaks clothes causing a cold effect in winter and hot one in summer.

NEW colour grey

TPU MEMBRANE

04508B KIND

CE CAT. I - EN ISO 13688:2013

Waterproof and breathable softshell made entirely of recycled material, equipped with three front pockets and two large full pockets; drawstring at the waist for a better fitting. This jacket match with Boom pants 9030B, 9032B and 9035B. The garment is made from recycled materials and in line with this choice, the packaging is in cardboard boxes and not in plastic.

EUROPA

Europa line: Our Europa line is synonymous with durability and comfort.
Made from 100% cotton, this range of workwear is ideal for those seeking strength and durability. The Europa line garments are designed to offer maximum protection in demanding work environments.

Key features:
- 100% cotton fabric.
- Traditional style design.
- Ideal for industrial and blue-collar environments.

SHOT

Shot line: Garments in SHOT line are made of 100% cotton fabric, by far the absolutely the best material for breathability and healthiness. The grammage of 250 g/m^2 allows the garment to be used all year round, especially during the summer season, solving the problems typical of garments containing polyester or synthetic fabrics.

Key features:
- 100% cotton fabric.
- Traditional style design.
- Versatile clothing for multiple situations.

EASYSTRETCH START STRETCH

Easy Stretch and Start trousers: Our work trousers are the ideal choice for those who want maximum comfort and elasticity during working day.
For those who want practical and technical clothing. Equipped with multi-purpose pockets and retro-reflective inserts. The technical trousers, in addition to a practical pocket mobile phone, allow the insertion of knee pads.

Key features:
- Stretch fabric.
- Fit.
- Clothing equipped with multifunctional pockets.

BOOM STRETCH

Boom line: Our ISSALINE BOOM line is dedicated to people who seek a combination of style, comfort and elasticity. These garments are designed with attention to details and are perfect for people who want a professional look without sacrificing comfort.

Key features:
- Superior quality stretch fabric.
- Modern and elegant design.
- Perfect for professionals who require style in the workplace.

STRETCH

Stretch line: Our Stretch line is the perfect choice for people who need flexibility and freedom of movement during work activities. These elasticated garments are designed to fit the body, allowing a full range of movement without restrictions.

Key features:
- High quality stretch fabric.
- Reinforcements in stressed areas.
- Suitable for active and dynamic professionals.

STRETCH EXTREME

Stretch extreme line: The Stretch Extreme line is our proposal for people who deal with extreme situations and need highly resistant and flexible clothing. These garments are designed to challenge the toughest conditions without compromises.

Key features:
- Extremely technical stretch fabric.
- Reinforced seams and protective details.
- Slim fit and extremely comfortable.

SHOT WORKWEAR

SHOT line clothing are made of 100% cotton, by far the best fabric for breathability and health.
The 250 g/m² basic weight allows clothing to be used all year around, expecially during summertime by solving the typical problems of clothing containing polyester or synthetic fabrics. Each item is finished with coloured inserts and practical multipurpose pockets. Technical trousers, as weel as a practical mobile phone pocket, allow knee pads' inserts.

8945

THE STRETCH SPECIALIST

Seventeen years ago we introduced the STRETCH concept to the world of workwear. It seemed an impossible challenge, but the more than 6 million garments sold have proven otherwise.
From 2017 with the STRETCH EXTREME line and in 2021 and 2022 with the START and BOOM lines, thanks to technical solutions and renewed fit and design, ISSALINE aims to consolidate its leadership in workwear.

ISSALINE BY PIP

Issa socks are designed thinking of use that can makes a worker wearing them with safety shoes or athlete engaged in race or training. Mixing natural fibers (cotton and wool) with technical fibers (Kevlar, Coolmax, nylon, elastam, etc.) can get an excellent result in terms of strenght and footwellness. Issa socks are ready to face all challenges, you will always find the most suitable sock for your needs.

ESPOSOCKS
Empty counter display

WINTER

01CHOCL
HOCKEY

Prized merino wool allows the maintenance of body heat and the avoidance of the accumulation of moisture, even in the harshest temperatures. The sock is industrially pre-washed and is naturally anti-bacterial. The anatomical reinforcements, the high-density insole, and the anti-stress cuffs guarantee pleasant comfort.

Composition: 90% Merino wool, 10% polyammide
Sizes: S (35-38 conformed woman),
M (39-42), L (43-46), XL (47-50)
Colour / lenght: 019 ecrù / long

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

WINTER

01CCARL
CARVING

Technical sock that provides excellent protection to those who work in particularly cold environments by mixing different materials. The anti-torsion elastic band, the reinforcements, and the impact-cushioning insole make the article ideal also for use in sports.

Composition: 35% wool, 30% Acrylic, 20% Cotton, 15% Polyammide
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Colour / lenght: 80 grey / long

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

WINTER

01CBIAL
BIATHLON

The article has a decidedly sporty fit thanks to its anatomical structure and the tubular and elastic inserts distributed on the foot, ankle, and leg. The breathable and heat-regulating Tactel Multisoft fleece fabric guarantees an ideal and constant microclimate even in the coldest weather.

Composition: 100% anti-bacterial Tactel.
Sizes: S (35-38 conformed woman),
M (39-42), L (43-46), XL (47-50)
Colour / lenght: 060 black inserts grey / long

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

ALL SEASONS
REINFORCEMENT KEVLAR®

00680
KEVLO

This socks has 3 important characteristics: antibacterial Amicor Plus that prevents bad odors, Klevlar that keeps the most stressed points (toe and heel) more resistant and the particular anatomic shape (there is a right sock and a left one). The average weight let the worker wear it throughout all the year.

Composition: 50% cotton, 30% polyammide, 10% elastomer, 8% aramid, 2% elastan
Sizes: S (35-38 conformed woman),
M (39-42), L (43-46), XL (47-50)
Colour / lenght: 060 black inserts red, grey, yellow Kevlar / long

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

ALL SEASONS
REINFORCEMENT KEVLAR®

01CTRIC
TRIATHLON

This sock has got three important charatteristics: Amicor Plus anti-bacterial that reduce the bad smell, Kevlar that give more resitance to the abrasion on the most stressed point (toe and heel) the special anatomic form (exist a left sock and a right one). The medium weight allows a all seasons use.

Composition: 50% cotton, 15% Amicor Plus, 15% polyammide, 10% elastomer, 8% Kevlar, 2% elastan
Sizes: S (35-38 conformed woman),
M (39-42), L (43-46), XL (47-50)
Colour / lenght: 060 black inserts grey, yellow Kevlar / medium

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

ALL SEASONS
REINFORCEMENT KEVLAR®

01COKVL
KV

The use of Kevlar, a high-tenacity fiber, guarantees this innovative sock with extreme resistance on the toe and heel, the parts subjected to the greatest friction. The anatomic structure and the graduated pressure mesh allow use for both work and sports. The average weight of the sock makes it usable throughout practically the entire year, in non-extreme conditions.

Composition: 62% cotton, 25% polyammide, 8% elastan, 5% aramid
Sizes: S (35-38 conformed woman),
M (39-42), L (43-46), XL (47-50)

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

ALL SEASONS

00670
DUOSLALOM

Pack of 2 pairs of winter sock SLALOM. Despite of its limited thickness, this sock can have a good resistance to cold thanks to Merinos wool. The good pressure on the calf benefit the blood circulation and give a winding-down effect.

Composition: 23% Merino wool, 25% acrylic, 29% polypropylene, 18% polyammide, 2% elastan e 1% carbon fiber.
Sizes: S/M (38-42), L/XL (43-47).
Colour / lenght: 060 one pair grey/black with green inserts and one pair grey/black with orange inserts / long

in blister
Minimum order: 3 blister of 2 pairs
Full box: 12 blister da 2 pairs.

ALL SEASONS

01COFFL
OFFICE

Meryl Skinlife, a technological bacteriostatic fiber, prevents the formation of bad odors. Anallergic and breathable, with heat-regulating properties. The particular elasticity, the industrial prewashing, and the aforementioned features make this sock a versatile product ideal for all seasons, except in extreme situations.

Composition: 100% Meryl Skinlife
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Colour / lenght: 060 black / long

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

ALL SEASONS

01CBASF
BASKET

IThe Dupont Coolmax fabric favors the outward expulsion of sweat, giving the foot excellent heatregulation. The average density structure, the elastic on the foot and the anatomical reinforcements provide protection from impacts and micro-traumas while at the same time carrying out a relaxing action.

Composition: 60% polyester, 25% cotton, 12% polyammide, 3% elastan
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Colour / lenght: 080 grey / average lenght (American)

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

SUMMER

01CBIKC
BIKER

Sock «invisible» keeps the foot always cool and dry. The entire slab of the foot is an average density for cushion shock and give a nice touch to the foot. The back tab is slightly padded and protects the tendon from friction of the ankle. Ideal in the warmer months using safety shoes or sports shoes fabric.

Composition: 75% cotton, 22% polyammide, 3% elastan
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Colour / lenght: 060 black / equal shoes

in blister
Minimum order: 3 pairs per size
Full box: 24 pairs.

SUMMER

01CRUNC
RUNNER

Thanks to Coolmax sock provides excellent breathability and thermal comfort even in the hottest periods of the year. The entire sole of the foot is protected from a medium density slab for mitigating impacts. The elastic band torsion and anti-stress cuff enhances the fit and performance both at work and sport.

Composition: 70% polyester, 25% polyammide, 5 % elastan
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Colour / lenght: 080 light grey - dark grey / short

in blister

ISSALINE BY PIP

Clothing

Hi-Vi HIGH VISIBILITY

ISSALINE by PIP offers high-visibility workwear that combines safety and comfort for working professionals.
Our high-visibility line is synonymous with compliance with current regulations and ensures a safer work environment. Let's explore together the different types of garments offered by ISSALINE by PIP.

Hi-Vi jackets are carefully designed to ensure maximum visibility in low-light conditions. The tri-color design not only meets safety standards, but also offers a comfortable and durable fit, ensuring optimal performance.

Hi-Vi vests are ideal for operators who need freedom of movement. Made from high-quality, reflective fabrics, ISSALINE vests provide visibility and safety without compromising comfort.

Hi-Vi pants combine style and function, providing reliable protection with durable, reflective materials. The range of sizes and fits offers a wide selection to fit every worker.

Hi-Vi polo shirts and t-shirts for a professional look without sacrificing safety are the ideal choice. With breathable and reflective materials, they combine style and safety for workers who work on the street or construction site.

Hi-Vi suits for environments that require extra attention to safety, offering protection without compromising freedom of movement. With reflective details and a comfortable fit.

In conclusion, ISSALINE by PIP is committed to providing high-quality solutions for workplace safety.

Note: The certification values shown in this catalogue may vary due to the continuous updating process; for exact data, please ask for updated technical data sheet.

ISSALINE BY PIP

M-PRO
MULTI-PROTECTION clothing

With almost 60 years of experience in the production and distribution of PPE, we are pleased to present the new ISSALINE M-PRO project, a complete range of multi-purpose clothing. In developing this project we have been guided by the desire to offer, to those who work in areas of high risk, the maximum and most up-to-date protection against the important risks to which they are subject in carrying out their work. In line with what has just been said, PPE has in fact the maximum number of possible protections, resulting in the majority of cases Pentavalenti, Atex and III Category certificates. Finally, the tradition accumulated in workwear helped us not to underestimate the aspects relating to comfort and wearability, non-secondary characteristics for those who must wear these garments for the whole day.

08290 ISSALINE CHEM

CAT. III Type 5,6 - Reg. EU2016/425

Disposable overall in third category with zipper covered by a flap; in order to protect the zipper from the entry of toxic dust there is a doublesided adhesive along the entire flap. Elasticated wrists, ankles and along the cap for better insulation, the cap is divided into three parts for better adherence.

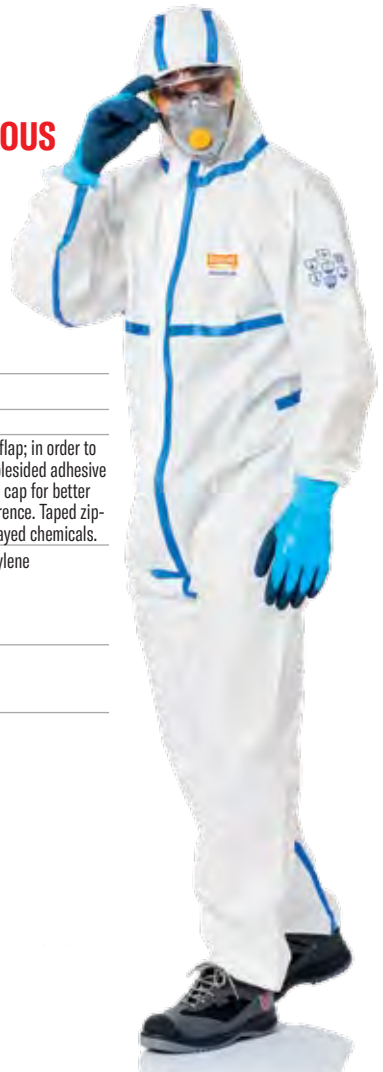

Composition: Microporous film Polypropylene and polyethylene
g/m²: 65
Sizes: S-M-L-XL-XXL-3XL
Colour: 050 white.

Single packed in a poly bag
Full box: 25 pcs.

In a hangable envelope

LLUVIA PU RAINSUIT (JACKET TROUSERS)

Jacket: foldaway hood, back and armpit ventilation, plastic zipper closure with flap and buttons, windproof cuffs, two pockets with rainproof flap, buttons cuff. Drawstring waist.
Trousers: elastic waistband with drawstring, leg bottom bellows with zipper.

Composition: PU/PVC/polyester
Sizes: M-L-XL-XXL-3XL
Colour: 010 yellow, 020 green, 040 blue

Full box: 10 sets

01700
RAINSUIT (JACKET TROUSERS)

Jacket: fixed concealed hood, back and armpit ventilation, fastener with plastic zipper, windproof cuffs, two pockets with rainproof flap. Taped seams.
Trousers: elastic waistband, two muff pockets, leg bottom snap button. Taped seams. Folded up in practical pouch with zipper.

Composition: PVC coated polyester
Sizes: S-M-L-XL-XXL-3XL
Colour: 010 yellow, 020 green, 040 blue

Full box: 10 set.

01702
RAINCOAT

Fixed concealed hood, back and armpit ventilation, fastener with double buttons system, windproof cuffs, two pockets with rainproof flap. Taped seams. Folded up in practical pouch with zipper.

Composition: PVC coated polyester
Sizes: S-M-L-XL-XXL
Colour: 010 yellow, 020 green, 040 blue

Folded in a handy zippered pouch.
Full box: 10 pcs.

01510
PONCHO

Foldable inside belt-bag, elastic strap with quick fastening buckles, snap buttons on side. Fixed hood with coulisse. Taped seams.

Composition: PVC coated polyester
Sizes: one size
Colour: 020 green

Full box: 25 pcs.

Hand protection

Hand protection is essential to ensure safety in the workplace. The human hand is composed of bones, muscles, and joints and performs various work activities, from the heaviest to the most delicate. Approximately one third of workplace injuries involve the hands, so it is necessary to use appropriate protective devices.

Hand injuries can include cuts, burns, and chemical injuries. Each accident can have health consequences and result in high costs. Using the right gloves can offer effective protection. Depending on the work activities carried out, there are different types of injuries that can be sustained: cuts, abrasions, burns, or blisters; burns or chemical irritations; thermal burns caused by heat; cold-related damage such as frostbite or frostnip.

It is important to understand the risks present and wear gloves specifically designed to protect against different injuries. There are different types of work gloves to protect hands from various hazards: leather gloves, cotton and knit gloves, synthetic materials such as polymer or polyacrylic. Depending on the specific application, there are gloves for welders, for dry or oily/wet-dry areas, cut-resistant gloves, heat or cold protective gloves, gloves for electricians, and for chemical agents. Depending on the duration of use, there are disposable or multi-purpose gloves.

When selecting protective gloves, consider the environment in which they will be used, whether dry or wet and oily. Gloves should provide delicacy and precision for specific tasks or be suitable for heavy work. Take into account the potential risks the gloves must protect against. To meet different needs, gloves are made from different materials, including latex alternatives for allergic individuals.

The PPE Directive defines three categories of hand protection: Category I for minimal risks such as household gloves, Category II for medium-level risks such as cut wounds (must have the CE mark), and Category III that provides protection against mortal risks or irreversible injuries (must undergo certification).

There are specific standards that regulate hand protection, including various resistance tests, manufacturer labeling, and information provided by the supplier. Additionally, there are specific product standards such as EN 388 for mechanical protection, EN 407 for heat, EN 511 for cold, EN 374 for chemicals and microorganisms, and EN 12477 for welding.

For more information, refer to the specific regulations in the last pages of this catalog.

Note: The certification values shown in this catalogue may vary due to the continuous updating process; for exact data, please ask for updated technical data sheet.

ISSALINE BY PIP

All for one, one for all? Better to use the right glove.

Iconography of use

This table gives general recommendations to facilitate the choice of gloves according to the work activity. However, it is only a general recommendation not to be taken literally and, especially in medium to high risk situations, require more in-depth analysis or advice of competent personnel.

Gloves packaged in a personalised hangable envelope

Gloves packaged in blister in cardboard recyclable and very often recycled.

Grippaz® Patented Non-Slip Gloves BY PIP

NEW STANDARDS FOR GRIP

Grippaz® is a range of semi-disposable gloves that has revolutionised the use of gloves in industry and automotive. Made from a special formula of NBR (Nitrile Rubber), it provides an excellent protective barrier against many chemicals, oils, grease, blood pathogens and viruses.

The patented herringbone grip has been independently tested and approved by the renowned British laboratory SATRA, certifying superior grip compared to other disposable gloves of the same thickness.

For more information see the Grippaz pages.

TOP QUALITY 17131T 17140T

The TOP QUALITY line distinguishes itself through the use of premium leathers that are not commonly found in work gloves.
These products were developed to cater to the demands of customers seeking high-end items comparable to 'national gloves.' As the leather used has gained popularity, it may not always be readily available.
We recommend verifying its availability at our warehouse before finalizing any orders for your customers.
Additionally, the gloves are packaged in smaller quantities than usual to avoid excessive compression during shipping and maintain their initial softness.

WORK & SPORT

ISSALINE's Work&Sport glove family is a game-changer in the industry, bringing together cutting-edge materials and ergonomic designs typically reserved for sports gear.

These gloves are crafted to deliver top-notch performance whether you're at work or at play, offering a versatile and effective solution.

Carefully chosen materials ensure durability and strength without sacrificing comfort, thanks to high-tech synthetic fibres that provide breathability and thermal insulation for various environmental conditions.

The ergonomic design of the Work&Sport gloves guarantees a snug fit and enhanced hand sensitivity, making them perfect for workers who require precision in their tasks, like craftsmen or professionals, as well as athletes seeking a protective and comfortable accessory for outdoor activities.

07203W
LONG COMFORT WINTER

CE CAT. I - EN 420:2003+A1:2009

High Tech glove with soft Clarino synthetic leather palm. Nylon Spandex back, flexible neoprene panel for protecting the knuckles. Washable at 30° C. With THINSULATE® lining against cold. Use: DIY, gardening, mechanics and for cold weather sports.

Fields of application: DIY, gardening, mechanics and low temperature sports.
Yarn: nylon spandex
Yarn colour: yellow
Palm: Clarino synthetic leather
Colour: yellow / black

blister
Sizes: M-L-XL
Minimum order: 5 pa.
Full box: 10 pa.

EN 388:2016

07203
LONG COMFORT

EN 388 2231X

High Tech glove with soft Clarino synthetic leather palm. Spandex nylon backhand, flexible neoprene panel to protect knuckles. Adjustable Velcro fastener. Washable at 30° C.

Fields of application: DIY, gardening, mechanics and low temperature sports.
Yarn: nylon spandex
Yarn colour: red
Palm: Clarino synthetic leather
Colour: red / black

blister
Sizes: M-L-XL-XXL
Minimum order: 5 pa.
Full box: 10 pa.

EN 388:2016
2231X

07204
SOFT GRIP

EN 388 2231X

High Tech glove with Clarino synthetic leather palm. Silicone-bound palm for excellent grip, shock-absorbing neoprene padding to protect knuckles. Adjustable Velcro fastener.

Fields of application: construction, plumbing, sport and leisure.
Yarn: nylon spandex
Yarn colour: orange
Palm: Clarino synthetic leather
Colour: red / black

blister
Sizes: M-L-XL-XXL
Minimum order: 5 pa.
Full box: 10 pa.

EN 388:2016
2231X

07206
ISSA SHOCK

EN 388 2231X

Glove with synthetic leather palm. Anti-slip sport grip on palm, shock-absorbent and anti-vibration gel padding on palm. Adjustable Velcro fastener.

Fields of application: electro-tool use with vibration, need for dry grip, mountain biking and other sports.
Yarn colour: black
Palm: synthetic leather
Colour: black

blister
Sizes: S-M-L-XL-XXL
Minimum order: 5 pa.
Full box: 10 pa.

07323
RACE

CE CAT. I - EN 420:2003+A1:2009

High Tech glove of sporting derivation, made of Clarino synthetic leather but enriched with rubber reinforcements, absorbent gel inserts, anti-slip silicone applications. Gussets are applied to the fingers to facilitate phalanx articulation. Only by wearing it can you understand the complexity and technology of this glove. Adjustable Velcro fastener.

Fields of application: DIY and leisure.
Yarn colour: red
Palm: Clarino synthetic leather
Colour: palm brown, back red

blister
Sizes: M-L-XL-XXL
Minimum order: 5 pa.
Full box: 10 pa.

07325
ARMY

CE CAT. I - EN 420:2003+A1:2009

High Tech glove with palm in soft Clarino synthetic leather. Camouflage back with knuckle protector insert. Practical Velcro fastener. Silicone anti-slip reinforcements on fingers (except index finger).

Fields of application: despite having a military look, it is versatile and can be used in any DIY, gardening and of course hunting/fishing work. Adjustable Velcro fastener.
Yarn colour: camouflage
Palm: Clarino synthetic leather
Colour: camouflage

blister
Sizes: M-L-XL-XXL
Minimum order: 5 pa.
Full box: 10 pa.

07326
STREET GLOVE

CE CAT. I - EN 420:2003+A1:2009

High Tech glove with palm made of soft Clarino synthetic leather. High-visibility stretch nylon back. Reflective band. Convenient Velcro closure.

Fields of application: automobiles, scooters and in general wherever a large sensitivity is required and it is appreciated that the glove is easily visible both at night and during the day. Please note: the glove does not have enough surface area to be certified according to current regulations in terms of high visibility.
Yarn colour: orange e yellow lime fluo
Palm: Clarino synthetic leather
Colour: orange and yellow lime fluo

blister
Sizes: M-L-XL-XXL
Minimum order: 5 pa.
Full box: 10 pa.

Hand protection

SUSTAINABILITY AT PIP

BETTER WORLD

SUSTAINABILITY IS NOT A TREND FOR US, BUT A PROCESS

As a company with global economic relations, we are committed to complying with applicable law, observing social and ecological standards and acting sustainably along our global value chain.

Responsibility for people and the environment is systematically implemented, continuously improved and is deeply anchored in our core processes and main products.

GREEN HEART®

GREEN HEART FOR A BETTER WORLD

In the products sector, we fulfil our responsibility and meet the demand of partners, end customers and retailers for environmentally friendly articles by developing sustainable products under the “Green Heart” label

HIGH STANDARDS

FOR A FAIR & SUSTAINABLE WORLD

We are achieving our mutual goal of a fair and sustainable world with the continuous improvement of our supply chain. We only work with partners who fulfil the environmental, chemical, health and safety related, and the social requirements. These requirements apply even if they are stricter than or contradict local standards.

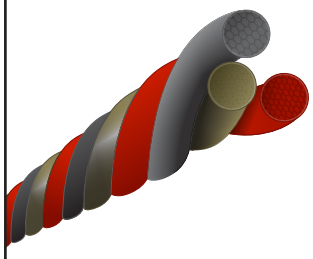

PolyKor®

HIGH-TECHNOLOGY CUT RESISTANT FIBERS & YARNS

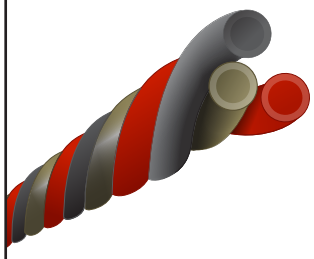

PolyKor®

PROTECTION. PERFORMANCE. VALUE.

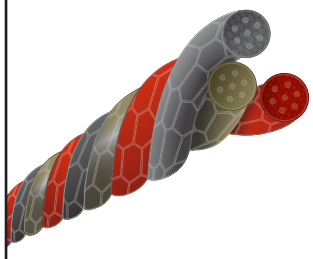

PolyKor® engineered yarns optimize performance, function and protection using proprietary blends of select fibers to exceed industry standards.
The ultimate objective is an affordable array of cut resistant gloves for practically every application.

PolyKor® X7™ TECHNOLOGY

HIGH DEXTERITY. MAXIMUM CUT RESISTANCE.

X7™ technology is the latest in engineered yarn development.
This super lightweight reinforced yarn provides very high cut resistance and durability by way of proprietary fibers.

PolyKor® XRYSTAL™

STRONGEST. TOUGHEST. HARDEST.

Xrystal™ technology represents the latest in PolyKor® engineered yarns that are combined with naturally hardened crystallized minerals.
The result is a super tough, durable, cut resistant fiber that is at the peak of performance.

A complete line of coatings

A COMPLETE LINE OF COATINGS UNMATCHED IN SELECTION AND PERFORMANCE

NEOFOAM®

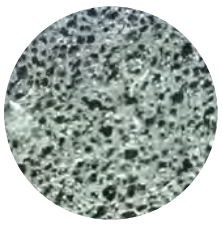

SECURE HANDLING OF LIGHT TO HEAVY PARTS OR ITEMS
Proprietary coating only available on G-Tek® brand gloves. NeoFoam® is a highly flexible coating that provides wearers with a high degree of grip, hand dexterity and comfort. It is versatile, hardworking, resistant to light oils and touchscreen compatible with most devices. The optimal choice for numerous handling applications.

► MICROSURFACE ► FOAM

NITRILE

TOUGH COATING FOR HEAVY-DUTY JOBS
Nitrile is a synthetic rubber compound that offers excellent puncture, tear and abrasion resistance. Nitrile is also known for its resistance to hydrocarbon-based oils or solvents. Nitrile coated gloves are the first choice for industrial jobs which require handling of oily parts. Nitrile is durable and helps to maximize protection

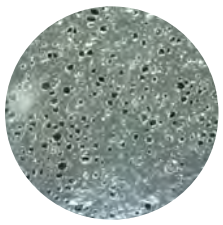

► MICROSURFACE ► FOAM ► FLAT / SMOOTH

► MICROSURFACE

Coating surface infused with thousands of tiny suction cup pockets. When pressed into contact with a wet or oily surface, they create a vacuum effect that disperses fluids away significantly improving grip.

> good grip in dry, wet or oily conditions

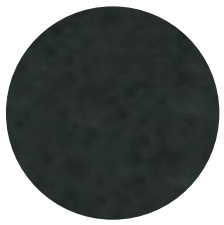

► FOAM

Foam coating cell structure is designed to channel fluids away from the surface of the object helping improve grip in oily conditions. Oily grip effectiveness varies with density of cells.

> secure grip in dry conditions

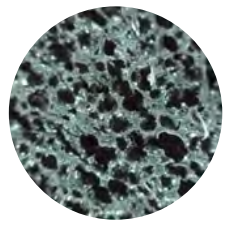

> fair grip in slightly oil or wet conditions

► FLAT / SMOOTH

Flat/Smooth coatings provide the wearer with a secure dry grip. Liquids will not absorb into the coating, keeping hands dry and clean.

> secure, tacky grip for dry surfaces

► MICROFOAM

MICROFOAM (micro-foam) is a special formulation that allows gloves to be covered with a thin layer of nitrile for better improved grip, dexterity , comfort and breathability.

> Controlled grip on dry dry and slightly oily surfaces

> premium comfort and flexibility quality

► CRINKLE

Crinkle coatings have creases or wrinkles on the surface of the coating that are designed to channel fluids away and allow better contact on dry or wet surfaces.

> secure grip in dry or wet conditions

► FLAT/TEXTURED

Flat/Textured PU takes on the surface properties of the glove liner which results in the thin, conformable deposit of coating material. The flat, textured nature of this coating is unique to Polyurethane (PU) coated gloves.

> tactile grip in dry and in slightly oily conditions

LATEX

TOUGH JOBS — DRY OR OILY-WET
Latex is a natural rubber that is flexible, tough and durable, delivering a high degree of resistance to snagging, puncture and abrasion. Latex is waterresistant as well as resistant to protein-based oils. Latex is not recommended for jobs that involve contact with hydrocarbon-based oils or solvents.

► CRINKLE ► MICROSURFACE

POLYURETHANE

IDEAL FOR PRECISION HANDLING AND LIGHT TO MEDIUM DUTY JOBS
Polyurethane (PU) is a tough, proven material that offers good tactile sensitivity by way of its thin material deposit. It conforms intimately over multiple glove liners to provide flexibility, dexterity and tactile sensitivity. PU coated gloves are amongst the most commonly used because they are versatile and provide excellent value. Newer, water-based PU coatings offer improved flexibility and less environmental lifecycle impact.

► FLAT/TEXTURED

NEW

Serie X-Treme™

R-ESPIR COATING TECHNOLOGY™

COMFORTABLE & BREATHABLE
Our gloves are designed to be comfortable and breathable. This increased breathability combined with the Sanitized® hygienic function, prolongs freshness and protection and comfort, even when used intensively and repeatedly. It has been designed and developed to improve comfort by by eliminating the build-up of heat inside the glove, guaranteeing 360° breathability for the hand.

EN 407:2022
Protection Against Thermal Hazards

Gloves testet for fire

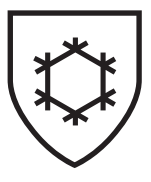

Gloves not testet for fire

A general standard designed to be used for any glove which is to be designed and sold as providing protection against thermal hazards. The standard includes six thermal tests: burning behaviour, contact heat, convective heat, radiant heat, small and large splashes of molten metal plus reference to EN 388:2016 and EN 420:2003 for mechanical and general performance requirements.

	Performance Levels		1	2	3	4
A	Burning behaviour	After flare time	<= 20 s	<= 10 s	<= 3 s	<= 1 s
		After glow time |	Not reqd.	<= 120 s	<= 25 s	<= 5 s
B	Contact heat	Contact temperature	100 °C	250 °C	350 °C	500 °C
		Threshold time	>= 15 s	>= 15 s	>= 15 s	>= 15 s
C	Convection heat	Heat transfer delay	>= 4 s	>= 7 s	>= 10 s	>= 18 s
D	Radiant heat	Heat transfer delay	>= 7 s	>= 20 s	>= 50 s	>= 95 s
E	Small drops of melted	Heat transfer delay	>= 10	>= 15	>= 25	>= 35
F	Large quantity of molten metal	Heat transfer delay	30 g	60 g	120 g	200 g
X in this test denotes NOT TESTED						

EN 511:2006
Protective Gloves AgainsEt CNo5ld

The pictogram (to the left) will be accompanied by a 3-character code:

A - Resistance to convective cold = based on the glove's insulating properties, this measures the transfer of cold through convection (perfomance levels 0 to 4, with 4 being the highest).
B - Resistance to contact cold = based on the glove's thermal capacity when in contact with a cold object (performance levels 0 to 4, with 4 being the highest).
C - Permeability to water = Glove's capacity to resist water penetration (0 = Fail; 1 = Pass).

0 = Water penetration after 5 minutes (replaces the previous standard of 30 min).
1 = No water penetration after 5 minutes (replaces the previous standard of 30min).
X = Not Tested

Protection of breathing, eyes, head.

Welcome to our catalog dedicated to Personal Protective Equipment (PPE), your one-stop shop for industry dealers and specialists. Ensuring safety in the workplace is crucial, and PPE is essential for creating a safe working environment for both you and your customers.

OUR COMMITMENT TO SAFETY

We are dedicated to offering top-quality PPE that meets your customers' safety requirements. Every item in our inventory is meticulously chosen to guarantee reliability and long-lasting performance. We are here to address inquiries, offer technical guidance, and assist your business in any way possible. Ensuring your safety and that of your customers is our utmost priority.

Note: The certification values shown in this catalogue may vary due to the continuous updating process; for exact data, please ask for updated technical data sheet.

FILTERING FACEPIECES BREATHE SAFE

We begin with our range of filtering facepieces, designed to offer maximum respiratory protection.
Each product has been carefully selected to ensure maximum efficiency in filtering particles and harmful agents.
Our filtering facepieces are a reliable choice for ensuring respiratory safety in your workplace.

APPROVED DOLOMITE POWDER

DS8732D

FFP3 - NR D
EN149:2001+A1:2009

Facepiece filter for very toxic dust (Eg. Asbestos, cement, quartz) and water based mist and fumes. The level of protection is equal to 50 times the TLV (Danger threshold limit value). The mask is equipped with one exhalation valves consequently breathing is made easier.

Sizes: one size
Minimum order: 1 box of 5 pcs.

SPROCKET PEDESTAL Made of plastic, height 90 cm. Ballasted base minimum order: 12 pcs.
Full box: 24 pcs.

SR2004
JOINT FOR 5.5 mm CHAIN
In plastic material,
Full box: 1 pack. from 10 pcs.

SR2005
JOINT FOR 7.5 mm CHAIN
In plastic material,
Full box: 1 pack. from 10 pcs.

S20040
CHAIN
Made of plastic.
Length 25 mt. 5,5 mm thick
Full box: 8 pcs.

S20050
CHAIN
Made of plastic.
Length 25 mt. 7.5 mm thick
Full box: 4 pcs.

1108 only on request
SIGNALING CONE
Made of polyethylene with 1 reflective band. 30 cm size.
Full box: 10 pcs.

1109 only on request
SIGNALING CONE
Made of polyethylene with 1 reflective band 20 cm. 45 cm size.
Full box: 10 pcs.

1118 only on request
5-meter polyethylene chain + two 5.5-mm polyethylene chain link links 5-meter polyethylene chain in a bag, plus two link links.
Full box: 30 pcs.

1119 only on request
20-mm mushroom-shaped formwork protection.
Minimum order quantity: 400 pcs.

1120 only on request
35 mm mushroom-shaped formwork protection.
Minimum order quantity: 300 pcs.

S2000P
SCOOP SIGNS
Plastic, double-sided reflective green color, red. Diameter 30 cm.
Full box: 60 pcs.

MULTIPURPOSE TARPAULIN only on request
Lightweight, waterproof, polyethylene, durable and with eyelets.
Colour: blue. U.V. treatment.

Art.	Dimensions m.	Packaging:
00923	2x3	30 pcs.
00934	3x4	20 pcs.
00946	4x6	8 pcs.
00958	5x8	6 pcs.
00961	6x10	5 pcs.

S2070
STANDS FOR SIGNS
Plastic, double-sided plus opens and closes. Sign «Caution wet floor» included. Signs are interchangeable in the format 20x20 cm or 20x30 cm.
Full box: 6 pcs.

01113 only on request
REFLECTIVE BAND.
Sewable band with height 5 cm. in a roll of 200 mt.
Full box: 1 rolls
3M Scotchlite®

09428
LOWER BACK SUPPORT WHIT BRACES
Offers certain help to prevent back pain. It improves posture, and corrects the technique of lifting weights.
Colour: black
Sizes: L-XL
Full box: 10 pcs.

Eye protection

I/O BLUE TECHNOLOGY

PROTECT AGAINST HARMFUL BLUE LIGHT

Overexposure to blue light, including smart phones, tablets and computer screens, have been known to cause eyestrain, fatigue and possibly contribute to long term macular degeneration. I/O Blue lenses are uniquely coated to help filter out harsh blue light and improve worker comfort and visual acuity. Lenses are treated with a contrast booster to enhance color contrast.

MIRROR PLUS™ TECHNOLOGY

TAKE ANTI-REFLECTIVE PLUS™ TECHNOLOGY OUTDOORS WITH MIRROR PLUS LENSES

A mirror coating on the face of the lens will deflect sunlight from the wearer's eyes, delivering noticeably less glare and reflection than standard gray lenses. Anti- Reflective Plus™ coating on the back of the lens significantly reduces light reflecting back into the eye for enhanced comfort and performance.

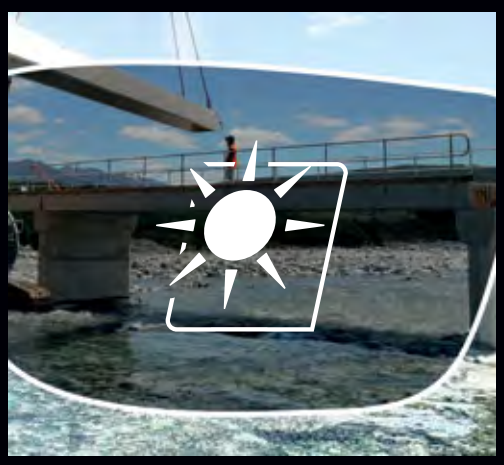

ANTI-REFLECTIVE PLUS™ TECHNOLOGY

THE CLOSEST THING TO NOT WEARING GLASSES

Bouton® Anti-Reflective Plus™ lenses allow an astounding 96% Visible Light Transmission (VLT) compared to the 88-90% VLT provided by standard clear lenses. Durable Anti-Reflective Plus™ coating significantly reduces the amount of light that reflects back into the wearer's eyes providing ultimate visual acuity. Inspect, sort and see with more clarity – and less eye fatigue.

TECHNOLOGIES DE VERRES

POLARIZED XL5™ TECHNOLOGY

FILTER REFLECTED SUNLIGHT FOR A CLEAR VIEW

Reflected sunlight from smooth surfaces, such as water, pavement and snow can dangerously hinder vision and cause significant eyestrain. Polarized XL5™ lenses filter the scattered light by controlling the angle at which it enters the lens. The result is clearer vision of the surrounding area and greatly reducing eye glare.

GRADIENT™ TECHNOLOGY

REDUCE GLARE FROM OVERHEAD LIGHT

High-powered overhead lights, such as fluorescent and mercury lighting, can cause glare that increases eye strain. Gradient lenses feature a slight mirror coating on the top portion of the lens, reducing glare, while the remainder of the lens remains clear. As a result, workers are still able to see clearly when looking straight ahead or down at their work.

FOGLESS® 3SIXTY™ TECHNOLOGY

PROVIDING WORKERS CLEAR VISION IN EXTREME CONDITIONS

Lenses fog for many reasons, all of which are related to ambient temperature and moisture in the air. When a rapid temperature change occurs, micro-water droplets in the air will collect on untreated lenses, causing the lenses to fog and impede vision.

HEARING PROTECTION

EAR PLUGS

HEARING PROTECTION

UNDERSTANDING EN PERFORMANCE MARKINGS

SNR

The SNR is the “Simplified Noise Level Reduction” or “Single Number Rating” which is the simplest way of getting a general indication for the level of protection provided. It is generally used to compare different types of hearing protectors. In very simple terms the calculation would be:

Noise Level 100 dB

Hearing Protector SNR -30 dB

Noise Reaching Ear 70 dB

The noise reaching the wearer should not exceed 87 dB and preferably lie between 70 - 80 dB. This calculation does not take into account different frequencies so may not be the most suitable measurement.

dB (decibel)

dB (decibel) is used to measure the sound intensity. Because the human ear can register sounds across a huge range of intensities a linear scale is not suitable for measurement. The dB scale is therefore a log scale which in very simple terms means the sound intensity roughly doubles for every 3 dB increase. An increase of 20 dB would increase the sound intensity 100 times, (ie 60 dB is 100 times louder than 40 dB).

Protection should ideally limit exposure to between 70 - 80 dB at the ear and not exceed 87 dB. However it is also important not to over protect as the wearer may not be able to hear other sounds such as fire alarms or vehicles. The user may also feel isolated resulting in reluctance to wear the hearing protection when needed. It is, therefore, best not to implement a blanket wearing of hearing protection only specifying protection where it is actually required.

CHOOSING THE CORRECT PROTECTION

The key to achieving optimal protection is selecting the ear plug size, shape and style suitable for each worker.

BULLET™

Fits to the natural contour of the ear canal.

FLARE™

Wide base seals out dirt and debris.

T-FIT™

Designed for easy handling, fit and long term wear.

SoftStar™

Classic cylinder designis a proven favorite for many workers.

EZ-Twist™

Combines comfort with convenience, hygiene and ease-of-use.

COMMON APPLICABLE STANDARDS

Standard	Detail

EN 352-2	For Ear Plugs
EN 352-3	For Helmet Mounted Ear Muffs

SELECTING APPROPRIATE PROTECTION

How To Decide On Protection Levels - A Simple Guide

The best way to decide on whether or not protection is needed is to arrange a specialist survey from an independent professional. If an employee needs to raise their voice to be heard a few feet away then the noise levels may be over 85 dB and immediate action should be taken.

PowerSoft™
FOAM TECHNOLOGY

Getting a proper fit

Foams with small, dense cells may result in:
> harder plugs with shorter rebound time
> more pressure and discomfort in ear canal

Foams with large, airy cells may result in:
> uneven roll-down and longer time to fit
> Longer rebound time

PIP® EAR PLUGS WITH POWERSOFT™ FOAM TECHNOLOGY DELIVER:
> OPTIMAL REBOUND
> MAXIMUM ALL-DAY COMFORT & PERFECT FIT

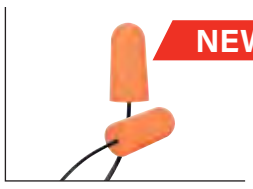

SINGLE-USE POWERSOFT™ TECHNOLOGIE | TECHNOLOGY

Soft & comfortable conical shape earplugs. Easy to shape for quick & easy insertion.

Make unique your point of sale:

- ISSALINE WALL
- ISSALINE MODULAR SYSTEM NEW
- ISSALINE MODULAR WOOD NEW

In the competitive world of retail, standing out is crucial to attracting and satisfying customers. With the "Modular ISSALINE" system, customizing your store becomes not only possible, but also a significant competitive advantage. Let me guide you through the endless customization possibilities offered by this innovative system, transforming your store into a unique customer experience.

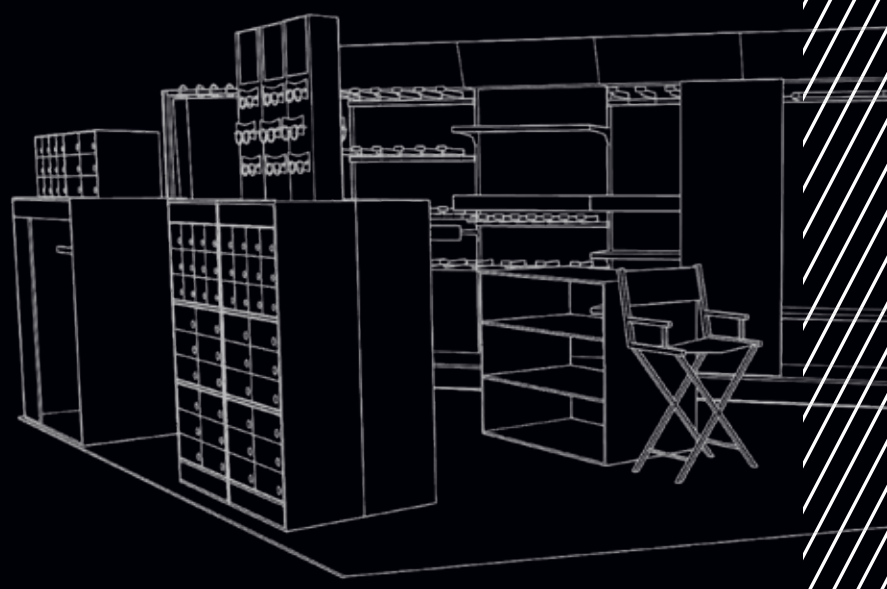

The concept of Modular ISSALINE is based on the idea of making the most of the space available in your store, offering a modern, streamlined presentation of products, enhanced by explanatory graphics. Its flexibility allows it to adapt to the specific needs of your store, creating an attractive and functional environment that guides customers in choosing the Personal Protective Equipment (PPE) best suited to their needs.

One of the distinguishing features of the Modular ISSALINE system is its modularity. You can customize your store layout according to the size of the available space and your aesthetic preferences. Whether you need a wall display, islands of products in the center of the store, or a combination of both, Modular ISSALINE can be configured to meet your needs.

Immagine creating a display wall that captures customers' attention as soon as they enter your store. With Modular ISSALINE, you can organize your PPE into neatly arranged and orderly boxes, highlighting the features and benefits of each product through clear and informative educational elements. This not only makes it easier for customers to locate what they need, but also helps them make informed decisions about their purchasing choices.

Modular ISSALINE enhances your customers' experience, optimizes your store's operational efficiency. Its intuitive design and easy assembly saves time and resources during installation and maintenance. Furthermore, its durability and the possibility of modular upgrades ensure that your investment continues to provide value over time.

In store merchandising

ISSALINE WALL

Make better use of your shop space

The new ISSALINE WALL concept is designed by combining a modern linear presentation with our box display system, enriching it with explanatory didactics. The result is a comprehensive proposal full of alternatives capable of attracting the end customer and guiding him in the choice of the best PPE.

Choose your module

The modules shown are made by composing the "BACK module" with the addition of some of the accessories shown here.

900600N	Changing room with curtain 950x900xh2000 mm	1

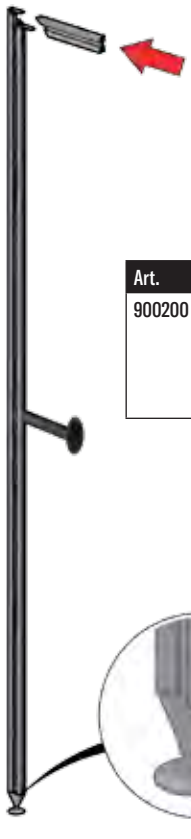

ISSALINE MODULAR SYSTEM NEW

With its versatility, the ISSALINE MODULAR SYSTEM adapts to a variety of spaces, offering a solution that is easily adaptable to all kinds of environments. A minimal design meets your store's needs while helping to define neat and well-organized environments.

To perform assembly, follow the instructions and technical diagrams included in the hardware packages. Use the included hardware scrupulously.

Notes: Digital User's Manual. By scanning the QR code in the packaging, you will be guided through the assembly process in a clear and detailed manner.

ISSALINE MODULAR WOOD NEW

The Issaline Modular Wood system is made using OSB panels, which offer multiple possibilities for customizing display spaces. The Modular Wood concept consists of simple but sturdy elements that can be adapted to different display needs.

This project focuses on the optimisation and reorganisation of space within the shop, allowing the best possible display of products when a display island is required and wall shelving is not possible.

Modular Wood, with an industrial style, is designed to display workwear and PPE.

Follow the instructions and technical diagrams included in the hardware packages to perform assembly. Use the included hardware scrupulously.

900100 MODULAR APPAREL A

Made of OSB wood dim. 110 x h 130 x d 60 cm supplied with hanging bar.

900100SX

MODULAR A graphics on Forex panel dim. 60x130 cm.
